

Nothing But Anthems

WHAT WE NEED FROM YOUR ROOM

Space	About 5m x 3m for the four-piece. Tell us if you are tighter and we will work out whether it is doable before you book us.
Power	Two standard 13A sockets on separate circuits.
Set-up	About 90 minutes, ideally before guests are seated. We can set up behind closed doors and sound check early if the schedule is tight.
Sets	Two 60-minute sets or three 40-minute sets, fitted around your running order rather than the other way round.
Finish	Midnight as standard, later where you are licensed for it.
Food	A hot meal for five — four musicians and the sound engineer. Most venues fold it into the evening catering.
Safety	Cables taped and made safe as standard. No smoke or haze unless you have approved it.
Line-up and dress	A four-piece, in basketball vests or suited to match the room. Your couple chooses; the show is the same either way.

WHAT WE BRING

- Full PA, sized to the room, run by our own engineer.
- Stage and floor lighting. No smoke or haze unless you have approved it.
- Backline for all four musicians, including an electric kit where a limiter requires one.
- Recorded music through our PA before, between and after the sets.
- All cabling, taped and made safe on arrival.

CERTIFICATION

Public liability	In place — certificate on request.
PAT testing	In place — certificate on request.

YOUR PAPERWORK

We will complete supplier forms, power requirement forms and risk assessments and return them in advance as standard, rather than on the day.

The current version of this document is always on our website. Anything here that does not suit your room — ask, and we will tell you honestly whether we can work around it. wmcfuk@gmail.com
